

Manipulation, Intimidation and Control: That's Witchcraft

Carol shared this teaching with us at our Kingdom Community gathering:

*"I have been watching, with great amusement, the beginning of Donald Trump's administration. Most people miss the sequence that set up this monumental shift. Two things happened prior to Cyrus emerging in Babylon: Jeremiah prophesied and Daniel prayed to birth the breakthrough. As we have seen in the first few weeks Trump's anointing as God's spiritual Cyrus has been tearing down the progressive agenda in true wrecking ball fashion. As the body of Christ we must understand that while the governmental office is the domain of Cyrus, **it is nothing less than the sustained intercession and engagement of believers that's going to reinforce any success that President Trump will have over the next four years...***

*Donald Trump refuses to be manipulated, intimidated or controlled. What is manipulation, intimidation and control? It's witchcraft. **Trump refuses to bow the knee to the witchcraft of media.** Media has had a spirit working behind it for so long it could make or break you in your career. With Trump, the arrows of media are like a pea shooter. It bounces off the armor. It's not working. Why? Trump has authority in the realm of media and in the governmental arena. Right now Hollywood, media and government is manifesting. What's next? Watch college campuses for protests, etc. **Strongholds are being shaken and hooks are being pulled out.**"¹*
