(2) Quantum Mechanics

All is not what it seems

What you've been taught and what you believe about reality is not accurate

Shock, horror.

Now our understanding is becoming more in line with true reality as it was created to be.

New, Similar Experiments Dramatically Achieve Rainer Plaga Suggestion To [Prove Parallel Universes](#)

In 1997, physicist Rainer Plaga wrote a paper suggesting an experiment to prove parallel universes exist. It was never tried. Marshall Barnes has now executed his own specific tests in Grandview Heights, OH, that achieve the same, incredible goal.

YELLOW SPRINGS, Ohio - March 1, 2017 - [PRLog](#) -- Research and development engineer, Marshall Barnes', laser experiments to test a different version of so-called retrocausality, are simultaneously proving parallel universes can be contacted. The results are consistent across two different but related experiments. Not only that, but Marshall extends the many-worlds interpretation into direct relationship with John A. Wheeler's participatory universe model, and shrugs off all interpretations of the behavior of particles on a quantum level, that result in retrocausality, as being a result of these particles "knowing" what they're doing. Instead, Marshall argues it's the universe or "omniverse" behind the results observed as part of the participatory function Wheeler had posited.

(3) Simulations

Another example

Scientific simulations are programmed by programmers, with data from scientists, with the purpose of 'proving' something

Don't get sucked into believing scientific simulations are reality or proof of natural phenomenon.

They are animate a possibility only.

Speaking of Science

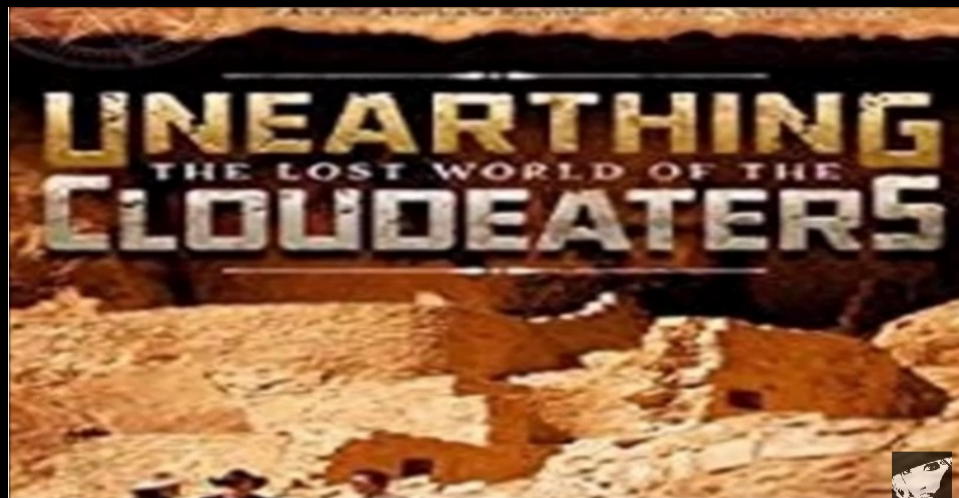

How Mars lost its atmosphere, and why Earth didn't

By **Joel Achenbach** March 30

Scientists have long suspected the solar wind of stripping the Martian
