

7M UPDATE

(December 2016)

Lance Wallnau gave a 7-Mountain update in a recent email blog:

“The 7 Mountain (7m) message has gone global and this year it took me headfirst into the cross hairs of the Media and Government Mountain's. It's one thing to talk about the Promised Land, but another to cross over and face the giants. In the end, we made history. It was Christians who made the decisive difference in this last election as 84% showed up and stood strong. What happens next? America has been given a gift of mercy – an extension of time – in the face of judgment. It should bother you that there is no cohesive strategy to keep those 84% of Christians engaged in the battle of ideas. While USA Today quotes me as one of the few evangelicals who predicted the future accurately, few are quoting me now as I urge believers to heed the warning – we only have a window of time!

This moment is not just an American "reset" – it is a global reset. **I am getting calls from believers in other countries that see this as the moment to shift their nation...Doors have opened into China and Africa...**”¹
