Are we living under a two-tiered system of justice?

Why do the wealthy and powerful escape prosecution for their crimes?

Using wit, wisdom, and gravity, an unknown intelligence insider known as “Q” has been communicating with anonymous citizens on message boards since 2017.

Q says corruption is worse than we know. It has invaded the corporate world, the media, academia, Hollywood, the church and other parts of society. It is the cause of war, poverty and countless problems that rob us of our potential.

Q’s mission is to bring about the “Great Awakening”— a coming era when we’ll unplug from the media programming that has indoctrinated us and awaken to the truth.

DAVE HAYES

I'll email you a sample

“We live in a culture today where reporters write articles and record interviews conveying their understanding of a given subject to us. It’s more like a monologue; there is no debate involved. There is no examination of underlying beliefs. There is no testing of logic or investigation of the factual basis of statements. We’re expected to accept the facts as they are given to us by the presenter without questioning them. The presenter doesn’t merely tell us ‘the facts’. →

They also assign meaning to the facts. Whoever assigns meaning to information determines the public narrative on that subject. The media tend to interpret information in a way that supports an ideological belief system. If you accept a person's presentation of facts, you're more likely to accept their ideological beliefs.

In contrast to the model of the mainstream media, Q uses the Socratic method. →

Using questions, he'll examine our current beliefs on a given subject. He'll ask if our belief is logical, then drop hints about facts we may not have uncovered, and suggest an alternative hypothesis. He may provide a link to a news story and encourage us to do more research. The information we need is publicly available. We're free to conduct our research in whatever way we want.

We're also free to interpret the information however we want. We must come to our own conclusions because Q keeps his interpretations to a minimum. For many people, researching for themselves, thinking for themselves, and trusting their own conclusions can make following Q difficult. When you're accustomed to someone telling you what to think, thinking for yourself can be a painful adjustment."
