

# HOW TO: Handle A Personal Prophecy

It is quite simple to take in a personal prophetic word when it's presented, because it's about YOU. When the word from the throne via a prophetic voice to you is spoken or read you are fully engaged because it's about your personal life.

You pay attention to every little detail:

- every word used;
- every word 'picture' presented;
- every scene described;
- every promise given; and
- every future direction supplied.

You take it and read it over and over again to see if there's anything you missed.

You ask the Lord to reveal anything to you that you missed in it.

You implement everything that is current because they are his instructions to you for your life. Future components you think through, presenting them to the King in your personal time with him, sharing your thoughts and waiting for his input.

You meditate on the word for weeks, even a month to ensure you get the instructions from Holy Spirit as to HOW you are to activate the components of the word given to you.

When the word is recorded, you listen to it on a regular basis over a year so that the King speaks more to you about what he originally said. You may even transcribe the word and read it over a similar time period, waiting for more input.

When he shows you how to activate the components, you step out in faith, walking through the doors that have been prepared for you.

**Personal prophecy is *rhema* that needs acting on.  
It's not given to make you feel good about yourself.**
