

How to Read My News Items

I am no longer adding a URL (Internet address) for the news items I refer to in my Forerunner documents.

To read an article that may interest you, you'll need to find it on the Internet yourself.

To do so, follow this information:

1. Open a search engine (e.g. Google)
2. Search using the article title
3. Add the news organisation if there are too many items in the search results.
4. Further fine-tune using the publication date if necessary.

Happy hunting.
