Kevin Donnelly

THIS week marks the 100th anniversary of the Russian Revolution. And even though history proves communism was an abysmal failure leading to totalitarian dictatorships where millions died and suffered, many in Australia's education system still yearn for a socialist utopia.

INSIDE THE FIRST CHURCH OF ARTIFICIAL INTELLIGENCE

 [MICHELLE LE](#)

“The new religion of artificial intelligence is called Way of the Future. It represents an unlikely next act for the Silicon Valley robotics wunderkind...Papers filed with the Internal Revenue Service in May name Levandowski as the leader (or "Dean") of the new religion, as well as CEO of the non-profit corporation formed to run it. The documents state that WOTF's activities will focus on "the realization, acceptance, and worship of a Godhead based on Artificial Intelligence (AI) developed through computer hardware and software". →

“That includes funding research to help create the divine AI itself. The religion will seek to build working relationships with AI industry leaders and create a membership through community outreach, initially targeting AI professionals and "laypersons who are interested in the worship of a Godhead based on AI". The filings also say that the church "plans to conduct workshops and educational programs throughout the San Francisco/Bay Area beginning this year".”
