

# Are You Willing to Speak For Me?

*(This short message came after I kept seeing coins rolling down an incline in my mind)*

The coins are rolling; rolling down the hill; rolling towards the end point of destruction. Destruction of what we know is civilization is ahead.

It is not a pretty picture, but it is one that must go out to the masses. They are waiting for a voice to speak to them. Are you willing to speak for me, to be my voice to the people? If so, nod your head and I will give you what you need to speak. I will give you the platform and the venue. All you have to do is follow my directions and I will give you what to speak.
