- DOCUMENTARY: "Big Data Is Watching"  
*"February 27, 2023. Millie Weaver presents " Big Data Is Watching ", an eye opening documentary about the growing dangers and vulnerabilities in the modern age of technological advancements in artificial intelligence and data surveillance. You will not be the same after watching this documentary!"*

- VIDEO: "The UN Pandemic Treaty Establishes a Global Police State"  
*"Dr. Francis Boyle joins The Alex Jones Show to call out the UN Pandemic Treaty that establishes a global police state."*

- \*\*\*"Directed Evolution"  
*"In an incredible undercover video, Project Veritas has exposed a Pfizer executive, Jordon Walker, who describes mutating viruses under the moniker "directed evolution" to be able to monetize a remedy—meaning, be both the problem and the solution. Pfizer has not denied it. They have not distanced themselves from Jordon Walker or denied he's an employee. They have just quietly begun disabling comments, which, of course, chills free speech. And the major networks are quiet as mice."*

- \*\*\*"The Billionaire Behind the Chaos: George Soros and the Rise of Crime in America"  
*"George Soros is the notorious billionaire who bankrolls many progressive groups, policies, and personnel. To understand why crime has risen and why the criminal justice system is failing America, you have to follow his money right down to the district attorneys. Soros built a whole philosophy on the reflexiveness of interconnected systems, whereby one system can influence another. His ideas on migration in Europe affect how migration happens across our southern border. You overwhelm the system, you create more chaos, and you play on people's emotions, making them more vulnerable. Once you create that disruption and get people in a more panicked state, you can manipulate them more easily."*

- "In the Move to 'Re-Educate' Him, Jordan Peterson Will Meet Fire With Fire"  
*"Cancel culture is in its own way democratic. Woke mobs—social media jackals or institutional flacks—don't care whether their target for immolation is male or female, famous or obscure, a leading intellectual light or a plodding time-server. All their targets have in common is an audience. A classroom, a Twitter account, a pulpit. The pilot light of their righteous wrath never sleeps. Perceived thoughtcrimes are their tinder. Targets run the gamut from weak to strong. The weak are limited in resources and support systems. Resistance seems futile. When they feel the heat, they confess to non-existent sins, hoping for mercy. Who can blame them?"*

- “The New Technocracy Threatening Hippocratic Medicine and The Nuremberg Code”  
*“Dr. Aaron Kheriaty is a psychiatrist, medical ethicist, and author of “The New Abnormal: The Rise of the Biomedical Security State.” He has filed several lawsuits against American institutions and the government challenging vaccine mandates and COVID-pandemic policy. “It’s a level of control over people’s freedoms that this kind of technology and this kind of system will make possible, that the totalitarian dictators of the past could only have dreamed of,” warns Dr. Kheriaty. We discuss the frightening transition from core ethical principles of medicine to a transhumanist, neo-Gnostic, technocratic medical paradigm, in which informed consent is inevitably replaced with an ideology of scientism and even self-spreading vaccines. “The concept is almost sort-of treating the human being like a piece of hardware that requires genetic-based coding—mRNA or DNA software updates—every few months to sort-of stay current and stay functional, as though the human body were like an iPhone,” says Dr. Kheriaty.”*

- “State-Mandated Suicide Proposed for Elderly Population; Hearing Reveals Weaponization of Government”  
*“A Yale professor recently proposed euthanasia as a solution to aging populations. Yusuke Narita, an assistant professor of economics, stated: “I feel like the only solution is pretty clear ... In the end, isn’t it mass suicide and mass ‘seppuku’ of the elderly?” He also stated on euthanasia that there’s a “possibility of making it mandatory in the future.” His comments are stirring debate over the direction that medically assisted death is taking, and whether the end result could be democide.”*

- “Russia Empowers China by Dumping Euros for Yuan”  
*“Moscow on Feb. 9 announced plans to exclude Europe’s currency from Russia’s sovereign wealth fund. Starting this year, China’s yuan and gold will apparently take the euro’s place. According to Russia’s TASS state media, the yuan may now compose up to 60 percent of the country’s currency funds and gold up to 40 percent.”*

- “Why Russia and China Are Stockpiling Gold; Central Banks Quietly Buying Gold at Fastest Pace in 55 Years”  
*“Looking across the entire world, it seems like most central banks are in the process of increasing their stockpiles of gold. In fact, according to the World Gold Council, central banks bought a record 399 tons of gold just in the third quarter of last year alone, and that’s the most recent data point that we have access to. This means that the central banks are buying up gold at the fastest pace in the last 55 years, which is notable because 55 years ago, the U.S. dollar was actually backed by gold, and most other currencies were tethered to the U.S. dollar. However, now, the U.S. dollar is backed by nothing.”*

- “WHO Aspires to Control and Manipulate People’s Behavior in the Next Pandemic”  
*“The World Health Organization (WHO) is dominated by communist and socialist sympathizers and is studying how to manipulate people’s behavior, according to anti-communist activist, researcher, and EpochTV host Trevor Loudon. “The WHO has a behavioral modification unit”, Loudon said in an interview with The Epoch Times on Thursday. Loudon explained that the behavioral modification unit means to “use psychology to manipulate people into following mandates, accept vaccines, etc.”. He explained his misgivings about the WHO’s mass-manipulation efforts, as well as his concerns that the organization is led by socialists, communists, and ideological allies of the Chinese Communist Party (CCP).”*

- “The Dark Side of ChatGPT”  
*“OpenAI is a research organization founded by Elon Musk and Sam Altman in 2015 as a challenger to Google. The original mission of the venture was to create artificial intelligence for the benefit of humanity as a whole. The most notable part of OpenAI is a function called Chat GPT. It’s a chat room like you’ve never seen before. Within a few days of launching, it hit one million users despite a total media blackout and zero publicity...But there’s another, darker side to ChatGPT that has become increasingly obvious to those who have been studying ChatGPT. It’s the notable use of intentional misinformation and a not-so-subtle left-leaning political bias that is built into the system. Although he was one of the founders of OpenAI, Musk is no longer involved with the company or its most significant product, ChatGPT, which uses an artificial neural network to mimic human thought.”*

- “How WHO Became China’s Coronavirus Accomplice”  
*“While the novel coronavirus is changing the world, China is trying to do the same. Already a serious strategic rival of the United States with considerable international clout, it’s now moving into a new field—health.”*

- “Power Outages: America’s Biggest Threat In 2023”  
*“A brutal attack on North Carolina’s power grid has left 45,000 residents in the dark and scrambling for a way to stay safe. In 2022 alone there have been over 70 attacks on the power grid with reports of six in Florida, five in Oregon and Washington. And according to national security experts, this trend is only going to continue. As America’s power grid comes under increasing attack, will your city be the next to fall victim to this growing threat? It’s a harsh reality, but one that we must face head on.”*

- “How the Vaccine Paradigm Has Led to Medical Coercion and Conflicted Health Agencies”  
*““COVID-19 vaccines—they were called ‘rushed.’ They said the clinical trials were rushed. They said development was rushed. But the reality is the clinical trials for the COVID-19 vaccines that the average American received, compared to the clinical trials for almost every childhood vaccine, were the most robust studies that have been done on vaccines.” We also look at the conflicts of interest between America’s health agencies and pharmaceutical companies. “Think about this business model. You have a vaccine. You can’t be sued for harms. You have a guaranteed market because kids are required to get it for school. And your health agencies promote it for you and defend against any harm,” says Aaron Siri.”*

- “Thought Surveillance Tech Launches This Year”  
*“Tools to monitor your brain activity are set to release this year, and already there are groups proposing how it can be used by businesses to monitor the thoughts of employees, and by law enforcement to spot potential criminals. The technology and its potential uses were discussed at the recent World Economic Forum meeting in Davos, Switzerland.”*
