- **“New Zealand: Communist Tactics Provide Playbook for the West”**  
*“A key tactic of communist activists is to take advantage of countries’ racial differences in an attempt to foment grievances and gain power for themselves. A clear example of this is unfolding in New Zealand among the native Maori population. The tactics being used are straight from the communist playbook, and can be easily recognized in their application around the world. By understanding this strategy, Americans stand a better chance of fending off the worldwide advance of communism.”*

- **“How Marxism Broke Down the Nuclear Family”**  
*“Karl Marx recommended the abolition of marriage in his Communist Manifesto, stating it would naturally bring with it the dissolution of the system of free love, which he called public and private prostitution. In other words, Marx thought that marriage was nothing but a form of “private prostitution.” Inspired by such teachings, in the 1980s, the Australian Union of Students issued a Policy Statement arguing that “prostitution takes many forms and is not only the exchange of money for sex ... Prostitution in marriage is the transaction of sex in return for love, security, and housekeeping.” This idea that marriage is a form of prostitution is accepted by a number of feminist scholars.”*

- **“Strong Families (Help) Keep Big Government at Bay”**  
*“In “The Communist Manifesto” Marx called for traditional family structures to be abolished because he regarded them as enabling capital and private wealth creation. And since the family is the primary mechanism for passing society’s values from generation to generation, strong families also reinforced the middle-class worldview Marx so abhorred. With revolution in mind, he argued the state must take over education and disrupt the familial nexus. Other Marxist thinkers carried this idea forward, arguing that the family is a tool of oppression and must be dismantled. Even democratic and ostensibly free countries are not immune to such thinking today. The Black Lives Matter movement, for example, has as one of its guiding principles to “disrupt the Western-prescribed nuclear family structure.” Progressives understand that strong families hinder revolutionary movements.”*

- **“The Boys of America Are Suffering—How Can We Help Them?”**  
*“Contrary to popular belief, the patriarchy doesn’t rule with an iron fist. Nevertheless, for some perverse reason, the myth of male privilege still persists. Today, only a fool could look around and honestly say that we live in a man’s world. Every 13.7 minutes, somewhere in the United States, a man takes his own life. For every female that commits suicide, there are four men ending their own lives. Millions of boys and men lead lives of quiet desperation, rotting away inside self-imposed prison cells. What should these men do? See a medical doctor, perhaps? Maybe visit a psychologist?”*

- **“Jordan Peterson Announces World Economic Forum Alternative”**

1 – WEBPAGE: [canberraforerunners.org/?page\\_id=7319](http://canberraforerunners.org/?page_id=7319)

*“Professor of psychology and public speaker Jordan Peterson has announced the formation of an international consortium that would serve as a kind of populist alternative to the elitist World Economic Forum (WEF) and provide a countervailing force against globalist aims and narratives. Peterson laid out his plan in an appearance on Joe Rogan’s podcast, telling him that an inaugural event of the group is being planned for the cusp of October/November 2023 in London. Around 2,000 business, cultural, and political figures will be invited to take part in the consortium, he said, adding that he wants the discussions open to the public and membership in the organization to be as broad as possible.”*

- **VIDEO: “The Alliance for Responsible Citizenship’s 6 Fundamental Questions”**

*“Dr Jordan B Peterson is an author, psychologist, online educator, Professor Emeritus at the University of Toronto, and ARC co-founder. He has written three books, Maps of Meaning, an academic work, presenting a new scientifically-grounded theory of religious and political belief, and the bestselling 12 Rules for Life, and Beyond Order, which have sold more than seven million copies.”*

- **DOCUMENTARY: “Gender Transformation: The Untold Realities”**

*“[This] docudrama examining the complex issues surrounding transgenderism and youth. The film explores the roles played by the education system, medical and pharmaceutical industries, the financial interests behind the transgender movement, and the societal and political mechanisms at work. The docudrama tells the real-life stories of several former transgender youth who started the gender transitioning process and their experiences at various stages of the journey through live interviews and re-enactments. Experts interviewed in the film reveal the life-altering medical and psychological impacts of the experimental medication used, including the irreversible side effects of puberty blockers, hormone therapies, and surgeries that are not reported by the media.”*

- **“Transgender Treatment in Children Leads to Lifelong Medical Side Effects”**

*“Altering the appearance of one’s gender through hormone treatment or surgery is a permanent decision with lifelong health consequences that go beyond cosmetics. Brittle bones, affected brain development, and the loss of a functioning reproductive system are among the possible side effects of gender transition.”*

- **“The Gender Industry Is Driven by Profits and Transhumanist Ideology”**

*“We sit down with investigative journalist Jennifer Bilek to discuss what’s driving the obsession with gender ideology... “It’s very, very profitable as an industry to sterilize young people and to convince them that they can be born in the wrong bodies, because you’re creating a market for big fertility or the technological reproduction ... industry, you know, the egg freezing, surrogacy, genetic manipulation, facial recognition. All sorts of technological innovations are happening now, and they’re happening very, very rapidly.””*

- **“AI Apps Most Dangerous for Your Privacy Revealed”**

*“The development of AI has created a variety of threats to the privacy of users’ data. To identify the most intrusive, data-hungry apps, researchers at Home Security Heroes investigated a total of 159 AI-based applications on Apple’s App Store. They found the following: “75 percent of AI apps share users’ data with third parties.”; “64 percent of investigated AI-powered apps track users’ personal data for their own marketing benefits.” ... ”*

- **“More Subliminal Manipulation: Expert Warns AI’s Spread Will Supercharge Consumerism”**

*“Rampant consumerism could get a shot in the arm as artificial intelligence keeps breaking boundaries, says music expert Peter Tregear. Tregear, the director of Little Hall at the University of Melbourne, says AI-generated music will likely proliferate even further to permeate people’s lives. Already, this type of music is available online and can be found in social media apps like TikTok, in advertisements, documentaries, and even shopping centres (Muzak)—encouraging shoppers to buy more.”*

- **“An Unofficial Q&A on International Health Regulations”**

*“The World Health Organization (WHO) includes a Q&A of its proposed health emergency instruments on its website. This document inadequately characterizes draft amendments that carry significant consequences for basic human rights and democratic process. Therefore, the proposals and their implications are explained further here, based on the WHO’s drafts, to support informed decision-making by States, legislators, elected persons, and the public.”*

- **“A Genealogy of Corporatism”**

*“It’s not capitalism. It’s not socialism. The new word we are hearing these days is the right word: corporatism. It refers to the merger of industry and state into a unit with the purpose of achieving some grand visionary end, the liberty of individuals be damned. The word itself predates its successor, which is fascism. But the eff word<sup>2</sup> has become totally incomprehensible and useless through misuse so there is clarity to be gained by discussing the older term. Consider, as an obvious example, Big Pharma. It funds the regulators. It maintains a revolving door between corporate management and regulatory control. Government often funds drug development and rubber stamps the results. Government further grants and enforces the patents. Vaccines are indemnified from liability for harms. When consumers balk at shots, government imposes mandates, as we have seen. Further, pharma pays up to 75 percent of the advertising on evening television, which obviously buys both favorable coverage and silence on the downsides.”*

- **“People Need to Understand They’re ‘Being Used Against Each Other’”**

*“Most people do not realize that America has been at war for a long time, but it is not a conventional war—it is a psychological war, said a filmmaker who recently released a documentary directing people’s attention to this important issue. “It’s a war of propaganda,” said Mikki Willis, filmmaker and creator of the “Plandemic” film series... “It’s a war to divide the people and weaken the strength of our collaborative communities to do anything about these new ideologies being forced upon Americans,” Willis said.”*

- **“3 Years With COVID-19: The Real Story and Its Connection to the Erosion of Democracy”**

*“What should have been a fine hour for medicine, science, and democratic governments instead became a march of folly of colossal failure—both from a professional point of view and from the point of view of the violation of fundamental freedoms and the loss of public trust.”*

- **“How Censorship Does and Doesn’t Work”**

*“We are watching the unfolding of despotism in real time. It is giving all of us a lesson in how it works. They locked us in our homes, closed our businesses, told us we can’t go to church or to restaurants, and restricted our travel, but then a problem began. Many people started objecting, and they asked questions.”*

- **“Exposing the Vaccine ‘Military Machinery’ Behind the Global COVID-19 Response”**  
*“I sit down with former pharmaceutical executive Sasha Latypova. She emerged from retirement during the COVID-19 pandemic to become a whistleblower after she observed the government and vaccine manufacturers veering away from established clinical research and public health protocols... “What we found is [that] the whole representation of what is happening is a lie ... The U.S. government is representing to the public that this is a health event and the response to a health event. But in fact, ... this is a military operation.””*

- **“Brace yourself! Why managers should adopt a synthetic media incident response playbook in an age of falsity and synthetic media”**  
*“Although we have long used manipulation to create a sense of falsity—from analog to digital techniques—falsity has arguably never been as hard to discern as it is now with the emergence of synthetic media manipulation. With an increasing quantity and quality of synthetic media, we find ourselves exposed to a new type of imitation game. We are particularly susceptible to believing synthetic media due to its ability to portray phenomena in a seemingly veridical manner using a high degree of...”*

*“An intelligence analyst is sounding the alarm on the Chinese Communist Party’s (CCP) military strategy of influencing the World Health Organization’s (WHO) policies through “One Health” ideologies. “We are at war with the Chinese Communist Party,” Brian O’Shea told The Epoch Times. “Many people don’t understand or see this because—as the Chinese say—the God of War has many faces.” In this case, the battlefield isn’t men in uniform with artillery, O’Shea said. “The battlefield is all around us,” he said.”*

- **“Why WHO Believes Fighting Disinformation Is Key in Next Pandemic”**  
*“The World Health Organization is now working to get global authority to manage pandemics. And in their new guidelines on the “Preparedness and Resilience for Emerging Threats,” the infodemic is back. It states that as a form of “community protection,” it needs a form of “infodemic management,” as well as “collaborative surveillance.” It states, “Infodemic cannot be eliminated it can only be managed. This is why WHO and partners have developed the approach of infodemic management,” armed with new capabilities for the job. It describes these as “tools and approaches for social listening,” including artificial intelligence that monitors social media, as well as other systems such as experts for “community engagement.””*

- **“WHO Adopts European-Style COVID-19 Vaccine Passports as Part of New Global Digital Health Certificate”**  
*“The World Health Organization (WHO) said it will take up the European Union’s digital COVID-19 vaccine passport framework as part of a new global network of digital health certificates... Dubbed the Global Digital Health Certification Network, the new vaccine passport framework has already drawn criticism, with Australian senator Alex Antic saying in a statement that the move is “just another conspiracy theory coming true.” Vaccine passports—and various other forms of digital identity schemes—have been criticized as an invasion of privacy and as having the potential to enable governments and corporations to coerce human behavior by, for instance, denying access to infrastructure or services.”*

- **“The Real Meaning of Recent WHO Negotiations and the ‘One Health’ Ideology”**

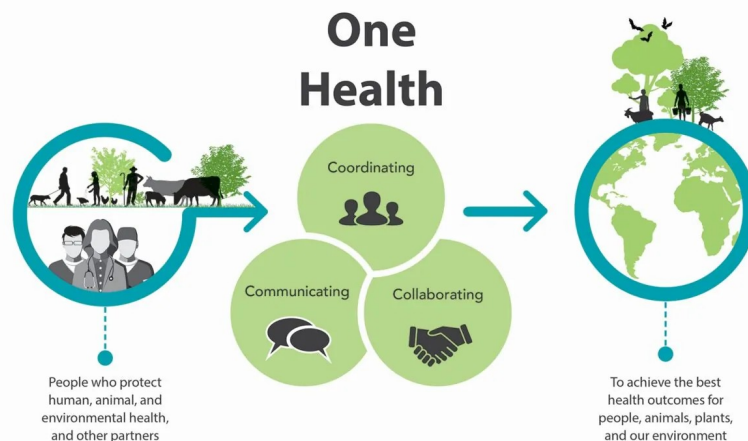

*“The World Health Organization (WHO) just concluded a new round of negotiations around a new pandemic treaty and amendments to the 2005 International Health Regulations. What is the significance of these changes? To find out, I sit down with Dr. David Bell, a public health physician and biotech consultant in global health. He is a former medical officer and scientist at the WHO and a senior scholar at the Brownstone Institute. “It’s very clear that the trajectory is about centralizing power over health emergencies ... and they’re already putting in place a very broad surveillance mechanism. They’re talking about ten and a half billion dollars a year.” In addition, “it will broaden the scope to what they call ‘one health,’” an ideology that suggests the welfare of animals and the environment as equally important to human life, Bell says. “This is suggesting that the important thing is life, not human life ... It then moves to seeing humans as almost a poison upon the earth,” Bell says. “So they need to be restricted. And they need to be confined in order to help other parts of the ecosystem.””*

- **“One Health, Holistic Medicine, and the Poisoning of Minds”**

*“The idea of a holistic concept of health—that our environment (or “biosphere”) influences our well-being, is far older than written history. So is greed, abuse, lust for power, and a desire to own and enslave others. Regarding what really matters, there’s nothing new under the sun. “One Health,” a modern term for this holistic approach to health, is therefore old news, as is a willingness to corrupt and manipulate such a concept for personal gain. Ill health is a lever for fear, and death even more so, especially to those who believe that we’re simply organic constructs that end in dust and decay. A cult feeding off these fears, holding that the entire biosphere is threatening us with diseases and death, would therefore have real potential for mass control. Convince followers that humans are the poison that made this world so destructive, and you’ll also have a means to stoke hate against nonbelievers while adding guilt to the tools for compliance.”*
