- “How the Great Reset Is a Plot of the Ultra Wealthy”
“The ‘Great Reset’ being pushed by the World Economic Forum is a tyrannical plan being advanced by the ultra-wealthy, according to Michael Walsh, and the COVID-19 pandemic is being regarded as an opportunity to implement it. The freedom of the world is at stake, and already agendas tied to it have undermined basic rights of people around the world, says Walsh, author, filmmaker, and editor of ‘Against the Great Reset: Eighteen Theses Contra the New World Order’.”

- “‘SMART CITIES’ Worldwide Being Converted Into ‘Open Concentration Camps,’ Says Ex-Silicon Valley Engineer Turned Whistleblower”
“This is how the globalists intend on breaking the backs of free Americans. They will do it through our finances, through the healthcare system and through the entertainment systems. Digital ID cards disguised as “health passports” or “SMART Health Cards,” will be required to work a job, to access the Internet and the coming digital bank accounts or digital wallets. The convergence of all these systems will make sure, in the words of U.N. Agenda 2030, “no person gets left behind.” By the time most people wake up and see that they have walked into a trap, it will be too late. They will have all your data, they will know everything about you, your strengths, your weaknesses, your vulnerabilities.”

- “How Google manipulates elections” [Research article]
 RESEARCH: *“In 2020, the 1.5 million ephemeral experiences we aggregated from the computers of our 1,735 field agents showed us manipulations that were sufficient, in theory, to have shifted more than six million votes to Joe Biden (whom I supported) – again, without people knowing they were being manipulated. Among other findings: Google was sending more go-vote reminders to liberals and moderates than to conservatives; that’s a brazen and powerful manipulation that would go completely undetected unless someone was monitoring.”*

- “The YouTube Manipulation Effect (YME)” [Research on YouTube’s manipulation of elections]
 RESEARCH: *“We conclude that in a national election in the US in which 100 million people voted, bias in YouTube sequences has the power to shift between 5.2 and 6.6 million votes over time without people knowing and without leaving a paper trail for authorities to trace.”*
