- ★ **“How Big Pharma Captured Public Health”**

“250 years of economic and political liberalism, and then it disappears in the blink of an eye in early 2020,” says Toby Rogers, a medical freedom advocate and a fellow at the Brownstone Institute. Over the last two years, he assessed every FDA and CDC expert advisory committee meeting for COVID-19 vaccine approvals—and what he discovered was shocking, he says. “It’s preposterous, the level of junk science that’s being passed off as actual science by FDA and CDC right now,” Mr. Rogers says.”

- **“The WEF and the Dangers of a Circular Economy”**

“In recent times, the Davos elites have been pushing the idea of a new economy, one that’s circular in nature. Should we be concerned? Some could say that the circular economy is an “agenda”. According to a recent report published by the WEF and Accenture, it is. The authors of the report said this is an “agenda” and that the directions must “come from the top”. A circular economy is the antithesis of today’s economy—or, as the authors of the report call it, the “linear economy”.”

- **“A Last-Minute Order From Obama Enabled Nonstop Leaking On Trump From Intelligence Community”**

“In the final weeks of the Obama administration, Section 2.3 of Executive Order 12333—Procedures for the Availability or Dissemination of Raw Signals Intelligence Information by the NSA—was signed into effect. Although widely overlooked, the implications were broad and far-reaching. Agencies and individuals could now ask the NSA for access to specific surveillance simply by claiming the intercepts contained relevant information that was useful to a particular mission. No privacy protection of the raw data was undertaken. Under the new rules, sharing of information was made significantly easier—and the information being shared was raw and unfiltered. Like many, we wondered at the timing of the order. But what we found particularly curious was that it was so overdue. Allow me to explain.”

- **"The Rise of Socialists in Latin America Is Giving Terror Groups a Home"**

"The new wave of leftist governments in Latin America, along with an increasingly brazen posture from Tehran, has given Iran and its proxy terrorist groups a favorable environment to mingle with organized crime, cross borders with impunity, and engage in more direct state-to-state exchanges, analysts say.

"There's always been a certain level of not only networks but also influence by both Hezbollah and behind Hezbollah, Iran, in the region," said Evan Ellis, a former State Department official and research professor of Latin American studies at the U.S. Army War College Strategic Studies Institute. "That increased with respect to the state-to-state Iranian engagement largely through populist actors in the mid-2000s, with a new crop of leftist populist leaders: Hugo Chávez, Evo Morales in Bolivia, and certainly Rafael Correa in Ecuador, among others. According to the European Commission's own website, the European Digital Identity can be used for a whole range of transactions, including providing personal identification on and offline, showing birth certificates and medical certificates, opening a bank account, filing tax returns, applying for a university, storing a medical prescription, renting a car, or checking into a hotel."
