- **“Greta Thunberg Criticized for Climate Disinformation”**

“Climate change activist Greta Thunberg is being criticized for spreading false information, after she deleted a post where she predicted a massive climate disaster was supposed to happen, which never happened. Meanwhile, whistleblowers claim that the Biden administration previously blocked criminal charges against Hunter Biden. And in other news, BlackRock will allegedly play a role in rebuilding the Ukrainian economy.”

- **“ANALYSIS: Solar Is a Booming Renewable and Impending Eco-Disaster”**

“The proliferation of renewable energy sources, especially solar power, has increased significantly over the past years, but the issue of how to tackle solar waste is becoming a cause of concern both inside and outside America... A 2019 study published in Renewable Energy estimated that the country will see roughly 9.8 million metric tons of solar panel waste between 2030 and 2060.”

- **“New shipping laws, a rising El Nino and a massive eruption: These are the other factors driving global temperatures to the brink of a critical threshold”**

“The world’s climate is changing at a rate of knots – but it’s not just due to the emissions of carbon dioxide and methane. There is a complex web of factors that is leading to a sudden spike in global temperatures.”
