- **★ “Shocking Number of Excess Deaths, Disabilities, and Injuries Revealed”**
“Edward Dowd was a Wall Street executive working as a growth portfolio manager for BlackRock. Utilizing his skills in recognizing fraud and interpreting statistics, he started compiling and analyzing data on injury and death associated with the COVID-19 genetic vaccines. “We applied what we did in finance to what we’re seeing in the populations across the globe in disability. So, we’re just measuring using our statistical tools to figure out when trends change. We saw excess death trend up in ‘21 and ‘22 and ‘23, and disabilities just really take off in ‘21,” says Mr. Dowd. He recently testified in the Senate about his findings, which are documented in his book, “Cause Unknown”: The Epidemic of Sudden Deaths in 2021 & 2022.”

- **“After 2-year Legal Fight, CDC Releases 780,000 Vaccine Injury Reports From V-safe System”**
“After resisting legal challenges for 2 years, the CDC has finally begun to release tranches of vaccine injury data that came from the self-reporting V-safe system. Let’s go through the history of this legal battle, as well as what the data reveals.”

- **“How the NIH Admitted COVID Vaccine Injury in a Suppressed Study”**
““The Department of Health and Human Services is sitting on over 12,000 claims by Americans injured by the COVID shots... They have a denial rate of 98 percent,” says Dr. Joel Wallskog, an orthopedic surgeon who became permanently disabled after getting a COVID-19 genetic vaccine. In this episode, he shares his story, and he breaks down how compensation for COVID-19 vaccine injury claims is treated quite differently from compensation for other vaccine injuries. We also dive into what the NIH actually knows about treating the COVID-19 vaccine-injured, something that was revealed in a suppressed preprint report. Dr. Wallskog is the co-chair of React19, a support organization for the vaccine-injured.”

- **“Study Finds ‘Significant Increase’ in Cancer Mortality After Mass Vaccination With 3rd COVID Dose”**
“Researchers observed “statistically significant increases” in mortality rates of all cancers, especially estrogen-related cancers, following mass vaccination with the third mRNA COVID-19 vaccine, according to a recent paper. The study, published on April 8 in Cureus, evaluated the impact of the

COVID-19 pandemic on age-adjusted mortality rates for 20 different types of cancer in Japan using official statistics on death, SARS-CoV-2 infections, and vaccination rates. The researchers made a startling discovery: There were no excess cancer deaths in Japan during the first year of the pandemic, but they observed a rise in cancer mortality coinciding with mass vaccination.”

- **“Coroner Investigates Moderna Vaccine Link to Woman’s Death”**

“Ms. Boyce’s death was the first case where the TGA linked a death to heart complications from either the Pfizer or Moderna mRNA vaccines.”

- **“How Ivermectin Trials Were Designed to Fail”**

“The use of ivermectin to treat COVID-19 is an ongoing debate. The central conflict is that although many doctors have reported success in using ivermectin, some studies published in major journals suggest it is in fact ineffective. Even as the FDA recently has been removing misinformation it posted about ivermectin, the agency has maintained its original position regarding its effectiveness, namely that there isn’t evidence. People who trust ivermectin claim that the studies showing ineffectiveness are fraudulent, while people who are skeptical of its use for treating COVID-19 view that as an anti-science conspiracy theory. As a professional with decades of research experience conducting dozens of clinical trials on antiviral drugs, I decided to dive deep into the studies purporting ivermectin’s ineffectiveness. What I found shocked me.”

- **“Did the FDA Just Admit It Was Wrong About Ivermectin?”**

“In a surprising move, the FDA has settled a lawsuit surrounding ivermectin, and has agreed to remove posts telling people not to take ivermectin to treat or prevent COVID-19. Besides the important precedent this sets for future FDA communications, this also tells us that the FDA would rather concede and settle this lawsuit than allow the case to go to discovery and have to turn over large numbers of internal documents, which could damage the reputation of the FDA and its senior management. We’re diving into the structure of modern propaganda machines and why false narratives become so entrenched and amplified across many institutions, beginning with the specific example of the FDA communications regarding ivermectin.”

- **“The Next Wave of mRNA Vaccines?”**

“A number of companies are now developing new vaccines and therapeutics using mRNA technology similar to what was deployed in the COVID-19 vaccines. Moderna, for one, has dozens of mRNA vaccines and therapeutics in development, including for flu, RSV, HIV, Lyme disease, Zika virus, cystic fibrosis, and even cancer. Scientists at the University of Pennsylvania are also working on a number of mRNA vaccines and treatments, including “mRNA technology to modify liver genes“ to help lower people’s risk of heart attack and stroke. Where is all this headed? What’s the difference between mRNA vaccines and mRNA therapeutics? And what about mRNA vaccines for livestock? Should people be concerned?”

- **“Vaccinated People Are Immune Imprinted, Have Unusual Response to COVID-19 mRNA Boosters”**

“People who have taken at least three doses of the original version of the COVID-19 mRNA vaccine have been strongly immune imprinted, a study by the University of Washington (UW) found. Consequently, when vaccinated with the most recent COVID-19 XBB.1.5 mRNA boosters, recipients produced few to no antibodies specific to the XBB.1.5 variant.”
