- ★ **“WHO Official Admits Vaccine Passports May Have Been a Scam”**

“The World Health Organization’s (WHO) Dr. Hanna Nohynek testified in court that she advised her government that vaccine passports were not needed but was ignored, despite explaining that the COVID vaccines did not stop virus transmission and the passports gave a false sense of security. The stunning revelations came to light in a Helsinki courtroom where Finnish citizen Mika Vauhkala is suing after he was denied entry to a café for not having a vaccine passport. Dr. Nohynek is chief physician at the Finnish Institute for Health and Welfare and serves as the WHO’s chair of Strategic Group of Experts on immunization. Testifying on April 11, she stated that the Finnish Institute for Health knew by the summer of 2021 that the COVID-19 vaccines did not stop virus transmission”

- ★ **“How Ivermectin Trials Were Designed to Fail”**

“People who trust ivermectin claim that the studies showing ineffectiveness are fraudulent, while people who are skeptical of its use for treating COVID-19 view that as an anti-science conspiracy theory. As a professional with decades of research experience conducting dozens of clinical trials on antiviral drugs, I decided to dive deep into the studies purporting ivermectin’s ineffectiveness. What I found shocked me.”

- ★ **“Ex-CDC Director Says It’s High Time to Admit ‘Significant Side Effects’ of COVID-19 Vaccines”**

“Dr. Robert Redfield, former director of the Centers for Disease Control and Prevention (CDC), said Thursday that many officials who tried to warn the public about potential problems with COVID-19 vaccines were pressured into silence and that it’s high time to admit that there were “significant” side effects that made people sick.”

- ★ **“Inside the Study that Shook the CDC”**

“Study that detailed sudden deaths in two teenagers following COVID-19 vaccination left officials scrambling... Two teenagers died shortly after COVID-19 vaccination, experts reported in a study published Feb. 14, 2022. Within hours, federal officials scrambled to respond, worried the paper would harm their efforts to promote COVID-19 vaccines, internal emails show.”

- **“CDC Found Evidence COVID-19 Vaccines Caused Deaths”**

“U.S. Centers for Disease Control and Prevention (CDC) officials found evidence that the Pfizer-BioNTech and Moderna COVID-19 vaccines caused multiple deaths before claiming that there was no evidence linking the vaccines to any deaths, The Epoch Times has learned. CDC employees worked to track down information on reported post-vaccination deaths and learned that myocarditis—or heart inflammation, a confirmed side effect of the vaccines—was listed on death certificates and in autopsies for some of the deaths, according to an internal file obtained by The Epoch Times...Despite the findings, most of which were made by the end of 2021, the CDC claimed that it had seen no signs linking the Moderna and Pfizer messenger RNA (mRNA) vaccines to any deaths reported to the Vaccine Adverse Event Reporting System (VAERS).”

- **“6-Foot Social Distancing Rule During COVID Not Based On Scientific Evidence, Ex-NIH Director Testifies”**

“Newly released testimony from Dr. Francis Collins, the former Director of the National Institutes of Health (NIH) who helped lead America’s COVID-19 pandemic response, indicates that there was a lack of scientific evidence for the six-foot social distancing rule that was a key fixture of COVID-19 restrictions...At one point in the interview, the committee majority counsel made reference to a January interview with Dr. Anthony Fauci, who said that the six-foot distancing rule “sort of just appeared” and was likely not based on any data.”

- **“The Surprising Potential of Ivermectin Against Cancer: Dr. Kathleen Ruddy”**

“I was as astonished as anyone might be that ivermectin has potential as an anti-cancer agent,” says cancer surgeon Dr. Kathleen Ruddy. She’s observed multiple cases where patients with severe, late stage cancer started to make a turn for the better after taking ivermectin. One patient with stage four prostate cancer tried all the traditional protocols like chemotherapy and radiation before being told that there was nothing left that his doctors could do. He started taking ivermectin as a last resort. In a few short months, he had made a stunning recovery. After observing several cases like this, Dr. Ruddy decided to launch a multicenter observational study on how repurposed drugs like ivermectin impact cancer survival rates.”

- **“Over \$20 Million Paid out in Vaccine Injury Claims in Australia”**

“The Australian government has paid out \$20.5 million (US\$13.2 million) in COVID-19 vaccine injury claims to people who experienced harm from the jab. Services Australia data provided to The Epoch Times reveals 6.82 percent of claims have been compensated so far, that is 286 out of 4,191.”

- **US: “House Committee Asks Blinken to Declassify Documents That ‘Credibly Suggest’ COVID-19 Leaked From Wuhan Lab”**
“Rep. Brad Wenstrup (R-Ohio), chairman of the House Select Subcommittee on the Coronavirus Pandemic, said classified State Department documents “credibly suggest” that COVID-19 originated from a “lab-related accident” in China. In a May 7 letter to Secretary of State Antony Blinken, Mr. Wenstrup asked the State Department to declassify the records, saying that the full contents of the documents would allow the American people to “have a more complete picture of the government’s evidence regarding the origin of the COVID-19 pandemic.” The lawmaker noted that the same documents had been released in 2023 in an “unclassified and highly redacted Freedom of Information Act production” to U.S. Right to Know, a nonprofit public health research group.”

- **“People With More COVID-19 Vaccine Doses More Likely to Contract COVID-19: Study”**
“People who received more than one dose of a COVID-19 vaccine were more likely to contract COVID-19, according to a new study. An analysis of data from Cleveland Clinic employees found that people who received two or more doses were at higher risk of COVID-19, Dr. Nabin Shrestha and his co-authors reported. The risk of contracting COVID-19 was 1.5 times higher for those who received two doses, 1.95 times higher for those who received three doses, and 2.5 times higher for those who received more than three doses, the researchers found. The higher risk was compared to people who received zero or one dose of a vaccine.”

- **“AstraZeneca Begins Worldwide Withdrawal of COVID-19 Vaccine”**
“AstraZeneca has commenced a global withdrawal of its COVID-19 vaccine on Tuesday, citing a “surplus” of updated jabs for new variants, months after acknowledging its rare risk of serious side effects. The pharmaceutical giant’s jab, Vaxzevria, is no longer authorized in the European Union as of May 7, after AstraZeneca requested the withdrawal of its “marketing authorization” on March 5. The removal of its authorization comes just weeks after the company admitted in a UK court document that its shot “can, in very rare cases, cause” blood clots and low platelets, a rare but serious condition known as thrombosis with thrombocytopenia syndrome (TSS). The company had originally denied a causal link.”

- **“Pfizer and a Corruption Too Deep to Fix”**
“The [Paxlovid¹] conspiracy is out in the open, and all official channels are implicated. There seems to be zero accountability or appeal. It’s no wonder that Robert F. Kennedy Jr. is calling for racketeering investigations into the whole industry and its industrial partners. This is aggressive robbery and fraud. Very few people even know to care because they are not being told the brutal facts of the case. One also wonders how it is that Pfizer held onto this study for two years before releasing it. Why would Pfizer choose just now to announce that its wonder drug is actually useless? My own theory: Its accounting ledgers are showing that the drug’s period of high profitability is at an end. There’s no more high-margin profits associated with it. Might as well retire it.”

- **“Exciting breakthrough offers hope for Long COVID patients”**
“Researchers from Griffith University’s National Centre for Neuroimmunology and Emerging Diseases (NCNED) have made a groundbreaking discovery that could bring relief to those struggling with Long COVID. In a world-first finding, they’ve identified a way to restore the faulty function of ion channels on immune cells using a well-known drug typically used for other medical purposes.”

- **“Systematic Review Reveals Many COVID-19 Vaccine Recipients Experienced New-Onset Psychosis”**
“Individuals who took COVID-19 vaccines were found to have later suffered from psychosis, with Pfizer and AstraZeneca shots linked to most of the cases. The peer-reviewed systemic review, published in the Frontiers in Psychiatry journal on April 12, examined cases of new-onset psychosis among people who took the vaccines. Psychosis refers to symptoms that occur when an individual has difficulty differentiating between reality and fantasy, with hallucinations and delusions being two key types. The review looked at 21 articles describing 24 cases of psychosis symptoms following vaccination. The researchers concluded that “data suggest a potential link between young age, mRNA, and viral vector vaccines with new-onset psychosis within 7 days post-vaccination”.”

- **“Key Ingredient in Pfizer and Moderna COVID Shots Aids Cancer Development, New Study Shows”**
“The role that a key ingredient in the COVID-19 mRNA vaccine plays in cancer development has been analyzed in a comprehensive review newly published in a peer-reviewed scientific journal. The conclusion: The specific form of this ingredient, pseudouridine, that Pfizer and Moderna use to make their vaccines aids cancer development. N1-methyl-pseudouridine (I will call it pseudoU in this article) is a critical component of the mRNA vaccine. Pfizer and Moderna chemically introduce pseudoU into their vaccines to make the mRNA molecules last longer in the human body (escaping degradation by enzymes), and to avoid suppression by the innate immune system, the body’s first line of defense against foreign invaders.”

- **“Vaccine Manufacturer Finally Admits to Stroke Side Effect”**
“A legal document has just been made public, in which AstraZeneca admits that its COVID-19 vaccine can cause a deadly blood-clotting condition. Let’s go through what this condition—thrombocytopenia syndrome—actually is, as well as what this admission means to the 51 people suing AstraZeneca for financial compensation.”
