COVID SCIENCE (July 2023)

- **“I Hate When Politics Is Injected Into Science’: Text Messages of Top Scientists Shed Light on COVID Origin Response”**

“A new report released by Republican members of the House Select Subcommittee on the Coronavirus Pandemic includes new evidence that a group of scientists who received funding from the National Institute of Allergy and Infectious Diseases (NIAID), conspired to dismiss the origin of the pandemic in order to protect China. The text messages were exchanged between authors of the Proximal Origin paper, initiated by then-NIAID Director Anthony Fauci, which had the explicit purpose of dismissing the lab leak theory for the pandemic’s origin. The Proximal Origin paper, which declared that no “laboratory-based scenario is plausible,” became one of the most cited science papers of all time and was prominently used by Dr. Fauci as proof that the COVID-19 virus came from nature.”

- **“COVID Vaccines Show 24 Times More Adverse Reactions Than Others”**

“The latest report on adverse reactions to vaccines in Western Australia has revealed that COVID-19 vaccinations have 24 times the rate of adverse reactions in the state compared to all other vaccines. According to the state’s vaccine safety surveillance report (pdf), COVID-19 vaccines showed that for every 100,000 COVID-19 vaccines administered, 264 adverse events following immunisations (AEFIs) were recorded. For all other vaccinations, 11.1 AEFIs were recorded, making the COVID-19 vaccines 23.8 times more likely than non-COVID-19 vaccines to result in adverse events.”

- **“Subclinical Heart Damage More Prevalent Than Thought After Moderna Vaccination: Study”**

“Damage to the heart is more common than thought after receipt of Moderna’s COVID-19 booster, a new study indicates. One in 35 health care workers at a Swiss hospital had signs of heart injury associated with the vaccine, mRNA-1273, researchers found. “mRNA-1273 booster vaccination-associated elevation of markers of myocardial injury occurred in about one out of 35 persons (2.8%), a greater incidence than estimated in meta-analyses of hospitalized cases with myocarditis (estimated incidence 0.0035%) after the second vaccination,” the researchers wrote in the paper, published by the European Journal of Heart Failure.”

- **“New COVID Vaccine Bombshell Emerges”**
“Earlier this month, a massive vaccine study was published in a medical journal—only to be censored 24 hours later. The study in question was conducted by nine medical researchers and was titled: “A Systematic Review of Autopsy Findings in Deaths After COVID-19 Vaccination.” This particular study was a systematic review of many different autopsies of people who died following vaccination. On July 5, this study was published on the Lancet Medical Journal’s pre-print server—the server where researchers can place their studies in order for them to get peer-reviewed. And according to Dr. Peter McCullough, who was the lead researcher, despite the fact that this study was experiencing “hundreds of reviews per minute,” the Lancet Medical Journal decided to pull it down.”

- **“None of the mRNA Vaccines Is Made of mRNA”**
“Despite everything we’ve been told, RNA-based COVID-19 injections were manufactured with modified RNA—not messenger RNA (mRNA). Modified RNA (modRNA) poses substantial risks to our health... To make mRNA useful for routine medicine, scientists had to artificially modify mRNA to increase both its efficiency and lifetime. The result: modRNA... The two—mRNA and modRNA—are completely different.”

- **“mRNA COVID Vaccines May Be Triggering ‘Turbo Cancers’ in Young People”**
“Experts are seeing a puzzling rise in cancer in people under 50 that appears biologically different from late-onset cancers. While some claim cancer rates have been rising for decades and attribute the increase to sugary drinks, lifestyle, and sleep disruptions, others say mRNA COVID-19 vaccines have caused an emergence of “turbo cancers”—and U.S. regulatory agencies have not addressed the ever-growing problem.”

- **“‘Serious Doubt’ About COVID-19 Vaccine Safety After Forced Release of 15,000 Pages of Clinical Trial Data: Legal NGO”**
“Conservative public interest advocacy group Defending the Republic (DTR) has obtained almost 15,000 pages of Moderna’s COVID-19 vaccine clinical trial data, claiming the data show an “utter lack of thoroughness” of the trials and calls the vaccine’s safety into “serious doubt”. As a result of successful Freedom of Information Act (FOIA) litigation against the U.S. Food and Drug Administration (FDA), the group recently announced it had obtained—and is releasing—nearly 15,000 pages of documents relating to testing and adverse events associated with “Spikevax,” Moderna’s COVID-19 vaccine.”

- **“1 in 35 Recipients of mRNA Boosters Got Heart Damage: Shocking Study | Facts Matter”**
“According to a new peer-reviewed study that came out of Switzerland, a staggering 1 in 35 recipients of COVID booster shots experienced vaccine-associated myocardial injury. One in 35. That is obviously a very shocking finding (especially when you consider that the estimated number of these heart damage cases was 800 times less going into the study).”

- **“EXCLUSIVE: CDC Changed Definition of Breakthrough COVID-19 After Emails About ‘Vaccine Failure’”**
“The Centers for Disease Control and Prevention (CDC) altered its definition of COVID-19 cases among the vaccinated, leading to a lower number of cases classified as a breakthrough, according to documents obtained by The Epoch Times. In early 2021, the CDC defined post-vaccination cases as people who tested positive seven or more days after receipt of a primary vaccination series, according

to one of the documents. The definition was changed on Feb. 2, 2021, to include only cases detected at least 14 days after a primary series, another document shows.”

- **“ Twitter files reveal extent of Australian government’s online COVID censorship”**

“Sky News host Chris Kenny says the federal government has secretly censored online posts about the COVID-19 pandemic over the past three years. “The government hasn’t revealed what it censored, but thanks to the Twitter files, we’ve learned some of what the government asked Twitter to spike,” he said. Mr Kenny discussed the issue with writer Andrew Lowenthal. “So far what we have found was 18 emails which detailed 222 specific requests,” Mr Lowenthal said.”

- **“Shocking Truth About Childhood Vaccines”**

“The Informed Consent Action Network (ICAN) is an organization whose mission is to bring transparency into the field of medicine (particularly with regard to vaccines). According to the mission statement on their website: “Our goal is to put the power of scientifically researched health information in your hands and to be bold and transparent in doing so, thereby enabling your medical decisions to come from tangible understanding, not medical coercion.””

- **“Fauci Knew Chinese Lab Was Conducting Risky Experiments: Email”**

“Dr. Anthony Fauci knew that researchers at a U.S.-funded laboratory in China were conducting risky experiments, according to a newly disclosed email. Dr. Fauci, at the time the head of the U.S. National Institute of Allergy and Infectious Diseases, joined a call on Feb. 1, 2020, with scientists around the world to discuss the possibility that COVID-19 was engineered or otherwise came from the lab in Wuhan, the city where the first COVID-19 cases were identified. After the call, Dr. Fauci wrote in the newly released missive that some of the scientists on the call expressed concerns after viewing mutations in the virus that causes COVID-19.”

- **“CDC Used Journal to Promote Masks Despite ‘Unreliable’ and ‘Unsupported Data’: New Analysis”**

“A new analysis of studies in the Centers for Disease Control and Prevention’s (CDC) flagship scientific journal found the agency promoted the effectiveness of masks using unreliable data with conclusions unsupported by evidence. The preprint, published July 11 on MedRxiv, found the CDC’s

Morbidity and Mortality Weekly Report (MMWR) made positive findings about the efficacy of masks 75 percent of the time, despite only 30 percent of studies testing masks, and less than 15 percent having “statistically significant results.” No studies were randomized, yet the CDC in over half of their MMWR studies, made misleading statements indicating a causal relationship between mask-wearing and a decrease in COVID-19 cases or transmission, despite failing to show evidence of mask effectiveness.”

- **“Scientists Investigating ‘Long Vax’ Symptoms Linked to COVID Shot”**

“Scientists at Yale and Harvard say they are starting to pay attention to conditions that may be caused by COVID-19 vaccines, which has been dubbed “long vax” in media outlets this week. “You see one or two patients, and you wonder if it’s a coincidence,” Dr. Anne Louise Oaklander, a neurologist and researcher with Harvard Medical School, told the Science website. “But by the time you’ve seen 10, 20 [patients],” she added, “where there’s smoke, there’s fire.” They said that symptoms of the so-called long vax, a term that was spawned from “long COVID,” can mimic those of long COVID, including fatigue, headaches, abnormal heart rate, and blood pressure issues.”

- **“Pandemic Destruction and the Emergence of Anti-Antibodies”**

““It becomes scarier the more you learn about it and the more new studies are coming up. Instead of making it better, every new study demonstrates some new alarming outcome.” During the COVID-19 pandemic, Dr. Mobeen Syed, also known as DrBeen, noticed there was a lack of unbiased, accessible information about both the virus and the vaccine. Using his skills as a physician and software engineer, he started making simple online medical lectures and illustrations about COVID. Today, he has over 1,000 videos and tens of millions of views on his YouTube channel.”

- **“Sorry but Serious Harms From the Vaccine Are Not Rare”**

“Drug regulators and public health agencies have saturated the airways with claims that serious harms following COVID-19 vaccination are “rare.” But there has been very little scrutiny of that claim by the media, and I couldn’t find an instance where international agencies actually quantified what they meant by the term “rare” or provided a scientific source. The best evidence so far has been a study published in one of vaccinology’s most prestigious journals, where independent researchers reanalyzed the original trial data for the mRNA vaccines.”

- **“mRNA COVID-19 Vaccines Should Be Labeled Gene Therapy Products: Peer-Reviewed Paper”**

“Now that the pandemic has ended, researchers are urging regulatory agencies to consider the safety issues associated with the rapid approval of COVID-19 vaccines—and to correctly classify messenger RNA (mRNA) vaccines as gene therapy products (GTPs) to prevent pharmaceutical companies from bypassing regulatory standards. According to a paper published in the International Journal of Molecular Sciences on June 22, COVID-19 mRNA vaccines, by mode and action, are gene therapy products and should adhere to different regulatory standards. Yet U.S. and European regulatory agencies have not classified COVID-19 mRNA vaccines as gene therapy products, which has allowed them to be regulated as vaccines against infectious diseases instead of being subjected to the more stringent regulation of GTPs.”
