- “31,696 COVID Vaccine Death Claims Submitted to CDC’s Reporting System Since 2020: Triple All Other Vaccines Combined Over 30 Years”
“The Vaccine Adverse Events Reporting System (VAERS) is an organizational structure run jointly by the CDC and the FDA. It’s a reporting system that accepts and analyzes the reports of adverse events following vaccination in order to try and determine whether those adverse events were caused by the vaccine in question.”

- “COVID-19 Can Increase Future Risk of Neurodegenerative Diseases”
“In research led by the University of Queensland (UQ),¹ COVID-19 was shown to activate the same inflammatory response in the brain as Parkinson’s disease and create a future potential risk for neurodegenerative conditions.”
www.theepochtimes.com/mkt_app/covid-19-can-increase-future-risk-of-neurodegenerative-diseases_4839117.html
- “Autopsies Show COVID-19 Vaccination Likely Caused Fatal Heart Inflammation: Study”
www.theepochtimes.com/mkt_app/health/heart-inflammation-can-be-lethal-after-covid-19-vaccination-study_4900037.html
STUDY: “Autopsy-based histopathological characterization of myocarditis after anti-SARS-CoV-2-vaccination”
pubmed.ncbi.nlm.nih.gov/36436002/
- “Study: COVID Causes Personality Changes”
“Published in 2022, a PLOS ONE research study performed longitudinal assessments of personality changes in 7,109 Americans, aged 18 to 109, during the COVID-19 pandemic. It is reported that, compared to the pre-pandemic period, people became less extroverted, open, agreeable, or conscientious. What is more astonishing is that these changes were equivalent to about one decade of normative personality change if occurring during a non-COVID period. Strikingly, younger adults showed disrupted maturity by a significant increase in neuroticism and a significant decline in agreeableness and conscientiousness.”

- “Cardiologists Come to the Same Conclusion Regarding COVID Jab Side Effects”
“In September of 2022— after a thorough investigation of the growing volume of data— Dr. Aseem Malhotra came to this conclusion: “The Covid mRNA vaccine has likely played a significant role or been a primary cause of unexpected cardiac arrests, heart attacks, strokes, cardiac arrhythmias, and heart failure since 2021 ...” Recently the Vaccine Safety Research Foundation (www.vacsafety.org) produced 'Until Proven Otherwise'— a short video documentary about the corroborating findings of these two leading cardiologists.”

- “Slew of Unusual Adverse Events Becoming More Common After COVID Vaccine Rollout”
“Since the rollout of COVID-19 vaccines, a significant proportion of vaccinated people have experienced many unusual adverse events. Doctors are raising concerns. Public health officials and vaccine manufacturers are also addressing the high incidence of blood clots, myocarditis, pericarditis, and menstrual irregularities. Since their rollout, COVID-19 vaccines have prompted more VAERS adverse event reports than all VAERS reports made in the previous 30 years, comprising over 55 percent of vaccine injury and death reports. These reports have thousands of different adverse event labels.”
