

MONTHLY UPDATES

COVID SCIENCE (November 2023)

- ★ **“The COVID Caper Gradually Unravels”**
“Think back to those grim days of mid-March 2020. Many things didn't make sense. There were screams about a new virus but no tests available for anyone to find out if we had the dreaded disease or not. The main question in everyone’s mind was, “How can I find out if I have this strange new bug?” Hold on just a moment there. If there were no tests, how do we know that there was a reason to panic? If there were only a handful of positive tests, how do we know for sure that the virus wasn’t here and spreading months earlier? Maybe what they were calling COVID-19 was here for a year or more.”

- **“Pre-COVID Documents Show That Fauci Lab Experimented On Wuhan Virus as Fauci Pushed for mRNA Vaccine”**
“You may have heard news reports that an Anthony Fauci-run lab in Montana was experimenting on coronaviruses from the Wuhan Institute of Virology—and that they were doing this more than a year before COVID-19 emerged. To make matters worse, the Fauci lab in Montana used bats for its reckless experiments that it obtained from a derelict roadside zoo in Maryland... But that’s not even the worst thing. The worst part of this entire story is that a guy called Ralph Baric from the University of North Carolina was front and center of the zoo-bat experiments. He just happens to be the same guy who taught the Wuhan lab to manipulate coronaviruses. Oh, and he’s also the guy who, right before COVID hit, signed an agreement with Moderna to develop an mRNA coronavirus vaccine.”

- **“These Experts Advocated for Lockdowns; Now They Say They Were Wrong”**
“As the dust settles from the COVID-19 pandemic and the fallout over lockdown policies becomes more pronounced, some lockdown proponents, like New York University Professor Scott Galloway, have admitted they were wrong for supporting lockdowns.”
* www.theepochtimes.com/article/these-experts-advocated-for-lockdowns-now-they-say-they-were-wrong-5533955
REPORT: www.ncbi.nlm.nih.gov/pmc/articles/PMC7952324
- **“Higher Incidence of COVID-19 Found Among Consistent Mask-Wearers: Study”**
“Some mask wearers were found to have up to 40 percent higher incidence of infection, contradicting earlier studies and opposing the narrative of mask mandates.”

- **“Texas Attorney General sues Pfizer, alleges pharma giant lied about COVID vaccine efficacy”**
“In a press release obtained by Fox News Digital, Paxton’s office accused Pfizer of “unlawfully misrepresenting the effectiveness of the company’s COVID-19 vaccine and attempting to censor public discussion of the product.” Paxton said Pfizer’s claim that its vaccine possessed 95% efficacy against infection was “highly misleading”. The Republican AG accused Pfizer of using misleading statistics from initial trial results to “unduly influence” consumer choice by giving the impression that the vaccine was durable.”

- **“Self-Amplifying RNA Shots Are Coming: The Untold Danger”**
“The next generation of RNA-based injections will contain self-amplifying RNA (saRNA). If the term “self-amplifying RNA” sounds frightening, it should. It likely brings to mind images of scientific experiments run amok. As discussed in a previous article, “mRNA vaccines” are not made with messenger RNA but with modified RNA (modRNA). These so-called vaccines are actually gene therapy products (GTPs), as modRNA hijacks our cells’ software. We have no possibility at all to gain influence on modRNA (or saRNA) after it has been injected.”

REPORT: www.mdpi.com/2076-393X/9/2/97
- **“Clots & Cancers Post-Vaccination Related to DNA Contamination?”**
“In this episode, Dr. Ryan Cole breaks down what we know about DNA contamination in the COVID-19 genetic vaccines, why it’s significant, and how it may be related to the rise in cancers and autoimmune diseases. “My concern isn’t just these COVID shots. My concern is this entire technology. A lipid nanoparticle in and of itself is an unproven product ... They’re trying to create them for RSV, and for flu, and for many other pathogens. It still takes those little gene sequences any and everywhere in the body,” says Dr. Ryan Cole.”

- **“Natural Immunity Better Than Protection From COVID-19 Vaccination: Study”**
“People with protection against COVID-19 following recovery from the illness were better protected than those who received a COVID-19 vaccine, according to a new study. People who received a vaccine were nearly five times as likely as the naturally immune to test positive for COVID-19 during the Delta era and 1.1 times as likely to test positive for COVID-19 during the Omicron era, researchers in Estonia found. The vaccinated were also seven times as likely to be admitted to a hospital for COVID-19 amid the spread of the Delta variant and two times as likely to be admitted to a hospital during the Omicron period, when compared with the naturally immune, the researchers found.”

- **“CDC Keeping a Second, Hidden vaccine side effect database”**
“The U.S. government’s Vaccine Adverse Events Reporting System (VAERS) is in the public crosshairs. The reason for this is two-fold. On one hand, you had a high-profile recent interview with RFK Jr., wherein he really laid into the flaws of the VAERS system. Secondly, you had the British Medical Journal (one of the most prestigious journals in the world) publish a report about how the VAERS system is “overwhelmed” to the point of being broken. And in that report, they revealed the fact that the CDC has actually been running two parallel VAERS systems: a public one with limited data, and a real one that only the government has access to.”

- **“New FOIA Document Reveals CDC Did Not Have Data Prior to Vaccine Recommendation for the Naturally Immune”**
“Today we can exclusively report on a stunning new Freedom of Information Act disclosure from the Centers for Disease Control (CDC) in response to an inquiry about the so-called COVID vaccines, and in particular regarding the efficacy and usefulness of the so-called vaccines for people who had already had COVID. There exists thousands of years of knowledge about the effects of natural immunity—meaning the human body’s natural ability to make antibodies for diseases which it has recovered from. Despite this mechanism being recognized since at least 430 B.C., the CDC insisted during the COVID pandemic that everyone had to take these so-called vaccines—including the naturally immune. What basis did the CDC have for making this claim? Incredibly, as they now admit in the new Freedom of Information Act disclosure, they had no basis other than the say-so of a bunch of authors who were sponsored by companies that manufacture the said vaccines. It is a scandal of epic proportions. Yet once again the media is silent.”

- **“Viruses Reactivated After COVID-19 and Its Vaccine May Be Linked to Lymphopenia: Study”**
“After a COVID-19 infection or inoculation with its vaccine, some people develop reactivated and recurrent infections, including herpes, Epstein-Barr virus (EBV), urinary tract infections (UTIs), and even COVID-19. Some emerging studies are linking this phenomenon to lymphopenia, or low numbers of lymphocytes.”
