- ★ **“Young Audiences Question Climate Alarmism, Prompting Calls to Censor Content”**
“A recent study has revealed significant skepticism among young audiences regarding climate alarmism, a development that poses a challenge to advocates of urgent climate action but is likely to be welcomed by those who see stoking fear about the supposed ills of global warming as exaggerated.”

- **“EVs May Cost More Over Lifetime Than Gas Powered Counterparts: Study”**
“A new study comparing the total cost of ownership of electric vehicles (EVs) and their gasoline-powered counterparts found that over the long term and considering various factors, some EVs were less costly but others—in particular, larger and longer-range ones—were more expensive. The study, carried out by researchers affiliated with the University of Michigan Center for Sustainable Systems, aimed to analyze the total cost of ownership (TCO) for gasoline, hybrid, and electric vehicles while considering a broader range of factors than many previous similar studies.”
