- **★ “James Lindsay and Logan Lancing Expose the Truth Behind Queer Theory”**
“*They actually believe that all children are intrinsically queer, and that what’s happening is that normal society is ‘socializing’ them, which is a fancy word for ‘brainwashing’ them, to be normal, which means—for them—not queer, where queer is a political stance.*” In this episode, I sit down with James Lindsay and Logan Lancing to discuss their new book, *“The Queering of the American Child: How a New School Religious Cult Poisons the Minds and Bodies of Normal Kids.”* “*It took me less than one minute to find a whole suite of furry literature about children adopting ‘fursonas,’ or furry personas, and identifying not as human, explicitly underwritten by queer theory in the doctrine,*” says Mr. Lancing. *What is queer theory? Who are its biggest proponents? And what practical impact has it had on America’s youth, our institutions, and society at large?*”

- **“Labor MPs Critical After Council Votes to Ban ‘Same-Sex’ Parenting Book from Library”**
“*Is it legal for a local government to pull same-sex parenting books from a library? And is it appropriate to withhold funding between tiers of government if they disagree with a decision? These are two questions that have arisen after a local council in Sydney voted to remove a same-sex parenting book from a suburban library service. At its ordinary meeting this month, the Cumberland City Council voted to ban “Same-Sex Parents” by Holly Duhig aimed at 5-to-7 year old children.*”

- **“Apparently, Mathematics Can Be ‘Racist’ ”**

“Is maths racist? Professor Rowena Ball at the Australian National University (ANU) thinks so. Professor Ball leads a research and teaching initiative called Mathematics Without Borders, aimed at “broadening and diversifying the cultural base and content of mathematics.” “Mathematics has been gatekept by the West and defined to exclude entire cultures. Almost all mathematics that students have ever come across is European-based,” she recently claimed. “We would like to enrich the discipline through the inclusion of cross-cultural mathematics.” Unsurprisingly, the allegation that maths is racist and therefore needs to be “decolonised” is not unique to ANU.”
